
policy and one evidence store, around every call

C8 Evidence store
immutable, keyed by
trace ID

↓ policy, identity, configuration, guards to every layer ↑ evidence to C8

cloud model service, in region open engine exit route

read-only for authoritative data governed tool gateway

open parsers built envelope with lineage

from day one firm telemetry collector two red-team tools

how often, and how much, reviewers edit what the system drafts

what lasts: who owns the evidence, who may approve,
what waits

A vendor-held store as the only copy of the evidence

On evidence only: deprecated or archived, unverifiable, an unresolved client-data incident, or a licence or terms blocker
