

Evaluation is a plane, not the last box

A PIPELINE VIEW

the last box, and usually built last

THE NEW BASELINE, END OF Q3 2026

firm-owned spine · replaceable plug-ins

THE ONE METRIC

Numeric faithfulness: 100%, any miss blocks

every figure in a draft matches the authoritative source; a language-model judge gets no vote on numbers

WHY OWN THE SPINE

5 of 11 products assessed

now belong to, or are being bought by, larger platform vendors

WORKED EXAMPLE · STEP 17

Instrument once on an open standard, own the eval harness and evidence store, and treat the products as plug-ins. The left-hand stack is a generic pipeline view; the right-hand stack is the new baseline.

Veyan · the view at end of Q3 2026
